

# ALPHA CYPERMETHRIN 10% EC

SYNTHETIC PYRETHROID WITH BROAD-SPECTRUM ACTIVITY

RAPID ABSORPTION

CURATIVE ACTION

PLANT PROTECTIVE

## TARGET PEST

## BOLL WORMS

## CROPS

- Cotton

## PRODUCT DESCRIPTION

Synthetic pyrethroid with broad-spectrum activity against chewing and sucking pests. Provides rapid knockdown with contact and stomach action, long residual activity, and rainfast properties.

## MODE OF ACTION

Alpha Cypermethrin affects the sodium ion channels in insect nerve cells, causing prolonged depolarization. This results in paralysis, convulsions, and death of target pests.

## DOSAGE

Crops	Target Pest	Dosage/ha (ml)	Water (L)
Cotton	Boll Worms	165-280	600-1000
