

# PROPAQUIZAFOP 10% EC

POST-EMERGENCE HERBICIDE

POST-EMERGENCE

SELECTIVE ACTION

GRASSY WEED CONTROL

BROAD-LEAVED CROP SAFE

## TARGET WEEDS

*Grass with spiky seed heads*

*Grass growing in pavement*

*Grass with panicle seed heads*

## CROPS

-  Soybean
-  Onion
-  Black Gram
-  Groundnut
-  Cotton
-  Vegetables

## DOSAGE

Soybean: 500-750ml/ha  
Black gram: 750-1000ml/ha  
Onion: 625ml/ha

## PRODUCT DESCRIPTION

It provides post-emergence selective control of annual and perennial grassy weeds in broad-leaved crops.

## MODE OF ACTION

Propaquizafop is absorbed through foliage and translocated to growing points where it inhibits the ACCase enzyme, leading to the stoppage of lipid synthesis and growth in grasses.
