

PROPAQUIZAFOP 5% + OXYFLUORFEN 12% EC

POST-EMERGENCE HERBICIDE

POST-EMERGENCE

BROAD SPECTRUM

DUAL ACTION
Systemic & Contact

SYSTEMIC & CONTACT

TARGET WEEDS

Barnyardgrass (*Echinochloa* spp.)

Yellow Foxtail (*Setaria pumila*)

Crabgrass (*Digitaria* spp.)

CROPS

-  Soybean
-  Groundnut
-  Onion

DOSAGE

Onion 875ml/ha

Soybean 875-1000ml/ha

Groundnut 750-875ml/ha

PRODUCT DESCRIPTION

It provides broad-spectrum post-emergence control of annual grasses and broad-leaved weeds in various broad-leaved crops

MODE OF ACTION

Propaquizafop inhibits the ACCase enzyme, while Oxyfluorfen causes peroxidation of membrane lipids leading to cell rupture. The mixture offers both systemic and contact action for complete weed control
