

# FLORPYRAUXIFEN-BENZYL 2% + CYHALOFOP-BUTYL 10% EC

## POST-EMERGENCE HERBICIDE

POST-EMERGENCE

ADVANCED COMBO

TOUGH WEED CONTROL

FAST ACTING

### TARGET WEEDS

*Echinochloa spp.*

*Cyperus spp.*

*Leptochloa chinensis*

### CROPS

Rice

### PRODUCT DESCRIPTION

It provides post-emergence control of tough and resistant grassy, sedge, and broad-leaved weeds in direct-seeded and transplanted rice

### TARGET WEEDS

- Echinochloa spp.
- Cyperus spp.
- Ammania spp.
- Leptochloa chinensis
- Fimbristylis spp.

1000-1200 ml/ha

### MODE OF ACTION

Florpyrauxifen-benzyl acts as a synthetic auxin, causing uncontrolled cell division and abnormal growth in susceptible weeds, while Cyhalofop-butyl inhibits the ACCase enzyme, targeting grassy weeds. The combination ensures fast-acting and prolonged weed control
