HEALTHY MAIZE

CROPS

-  Rice
-  Maize
-  Sugarcans
-  Vegetables, Fruits
-  Oilseeds

PRODUCT DESCRIPTION

It is a Nitrogen water-soluble compound containing 21% nitrogen and 31% sulfur. Provides benefits such as 24% sulfur, stimulates the vegetative growth, and increases nutrient availability.

BENEFITS

- Dual & chlorosis source (Nitrogen + Nitrogen) for rapid growth
- Improves protein quality
- Reduces oil grade pH and increases oil content in crops

MODE OF ACTION

The fertilizer is a mixture of Ammonium Sulfate + Sulfur, Zinc and Boron. It is a water-soluble compound that provides a quick and systemic action. It is used for increasing the vegetative growth and protein content in crops. It is also used for increasing the oil content in oilseeds.
