-  Groundnut

PRODUCT DESCRIPTION

It is a Nitrogen water-soluble compound containing 21% nitrogen and 31% Sulfur. Provides benefits 24% sulfur and 25% urea ensuring rapid growth, increasing availability of nutrients and soil pH.

BENEFITS

- Long-lasting soil nutrient supply (3-4 months), increases soil fertility
- Enhances protein content and increases P, Zn, Fe
- Improves crop quality

MODE OF ACTION

The fertilizer is absorbed through the roots and acts as a nutrient source. It provides nitrogen and sulfur, which are essential for plant growth. It also helps in soil acidification, which increases the availability of nutrients. The fertilizer is water-soluble and can be applied as a top-dressing or as a soil application.
