## DUST POWDER FORMULATION

DUST  
FORMULATION

BROAD  
SPECTRUM

CONTACT  
ACTION

FUMIGANT  
EFFECT

### APPLICATION AREAS

- ◆ Homes
- ◆ Food storage facilities
- ◆ Grain stores
- ◆ Warehouses
- ◆ Public buildings

### TARGET PESTS

- Cockroaches (*Blattella*, *Periplaneta* spp.)
- Stored grain pests (*Tribolium*, *Sitophilus*, *Rhyzopertha* spp.)
- Ants (various species)
- Bed bugs (*Cimex lectularius*)

### PRODUCT DESCRIPTION

Organophosphate insecticide in dust formulation for control of crawling insects and stored product pests. Provides contact and fumigant action with relatively low mammalian toxicity.

### MODE OF ACTION

Malathion inhibits acetylcholinesterase enzyme causing acetylcholine accumulation, continuous nerve stimulation, tremors, paralysis, and death. Dust formulation provides good penetration and adherence in treated areas.
