Cockroaches
(Periplaneta americana)

Ants
(various species)

Bed bugs
(Cimex lectularius)

Fleas
(Ctenocephalides spp.)

Ticks
(Ixodidae family)

PRODUCT DESCRIPTION

Synthetic pyrethroid insecticide in dust powder for control of household and public health pests. Provides rapid knockdown with good residual activity and low mammalian toxicity.

MODE OF ACTION

Permethrin disrupts sodium channel function in nerve membranes causing repetitive nerve firing, hyperexcitation, paralysis, and death. Dust formulation ensures deep penetration into insect harbourages.
