

# DINOTEFURAN 20% WG

**Third-Generation**

**Rapid Action**

**Systemic Properties**

**Water-Dispersible**

## PRODUCT DESCRIPTION

Third-generation neonicotinoid insecticide in water-dispersible granule formulation. Provides rapid action against sucking and chewing pests with systemic properties for comprehensive pest management in public health applications.

## APPLICATION AREAS

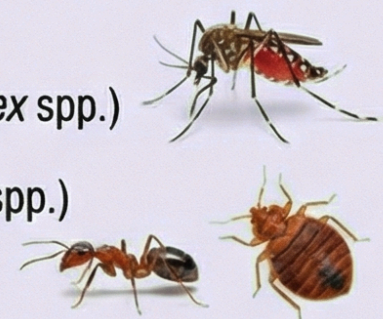

- Vector control programs
- Structural pest management
- Perimeter treatments
- Indoor residual spraying

## MODE OF ACTION

Dinotefuran acts as agonist at nicotinic acetylcholine receptors causing overstimulation of insect nervous system leading to paralysis and death. Fast-acting with both contact and systemic properties. Water-dispersible formulation ensures easy mixing and application.

## TARGET PESTS

- Mosquitoes (*Anopheles, Aedes, Culex* spp.)
- Flies (*Musca domestica*)
- Cockroaches (*Blattella, Periplaneta* spp.)
- Ants (various species)
- Bed bugs (*Cimex lectularius*)
