

IMAZETHAPYR 70% WDG

POST-EMERGENCE HERBICIDE

POST-EMERGENCE

DUAL ACTION
Contact & Systemic

BROAD SPECTRUM

EFFECTIVE CONTROL

TARGET WEEDS

Amaranthus spp.

Echinochloa spp.

Cyperus spp.

CROPS

-  Soybean
-  Groundnut
-  Sugarcane
-  Chickpea

PRODUCT DESCRIPTION

It provides post-emergence control of annual grasses and broad-leaved weeds in soybean, groundnut, and pulses

TARGET WEEDS

- *Amaranthus* spp.
- *Echinochloa* spp.
- *Cyperus* spp.
- *Digitaria* spp.
- *Chenopodium* spp.

MODE OF ACTION

Imazethapyr inhibits the ALS enzyme, blocking the synthesis of essential branched-chain amino acids. Absorbed through roots and foliage and translocated to meristematic regions, stopping weed growth
