

FENAZAQUIN 18.3% SC

ACARICIDE & INSECTICIDE

Fast-Acting
Contact Acaricide

Excellent Knockdown
Properties

All Life Stages
Control

Strong Ovicidal
Activity

TARGET PESTS

Nilaparvata lugens & *Sogatella furcifera*
(Planthoppers)

Planthopper Adult Form

Mites & Insects
(*Tetranychus* spp.)

CROPS

-  Rice
-  Cotton
-  Cabbage
-  Chilli
-  Brinjal
-  Okra
-  Tomato

PRODUCT DESCRIPTION

Fast-acting contact acaricide and insecticide with excellent knockdown properties. Highly effective against all life stages of mites and plant hoppers with strong ovicidal activity.

MODE OF ACTION

Fenazaquin disrupts mitochondrial electron transport by inhibiting complex I (NADH-CoQ reductase), leading to rapid cessation of cellular respiration and energy production in target pests.

DOSAGE INFORMATION

Rice-Brown plant hopper & White backed plant hopper: 375-425gm/375L.

APPLICATION BENEFITS

- Fast-acting contact acaricide with excellent knockdown
- Effective against all mite life stages
- Strong ovicidal activity
- Mitochondrial electron transport disruption

TARGET PESTS

- Brown plant hopper - *Nilaparvata lugens*
- White backed plant hopper - *Sogatella furcifera*
- Mites & Insects, whiteflies
