

FLUBENDIAMIDE 8.33% + DELTAMETHRIN 5.56% SC

INSECTICIDE

POWERFUL DIAMIDE +
PYRETHROID COMBINATION

ENHANCED
PEST CONTROL

IMMEDIATE KNOCKDOWN +
LONG-LASTING PROTECTION

LEPIDOPTERAN +
THRIPS + BEETLES

TARGET PESTS

LEAF FOLDER

CUCUMBER BEETLE

POD BORER

CROPS

-  Chickpea
-  Cucumber
-  Rice
-  Chilli
-  Tomato

TARGET PESTS

- Pod borer – *Helicoverpa armigera*
- Cucumber beetle
- Fruit fly
- Leaf folder – *Cnaphalocrocis medinalis*
- Hispa – *Dicladispa armigera*
- Thrips – *Scirtothrips dorsalis*
- Fruit borer – *Spodoptera litura*

PRODUCT DESCRIPTION

Powerful combination of diamide insecticide with pyrethroid for enhanced pest control. Provides immediate knockdown and long-lasting protection against lepidopteran pests, thrips, and beetles

MODE OF ACTION

Flubendiamide disrupts calcium release in muscles while Deltamethrin interferes with sodium channels in nerve cells. This synergistic action provides rapid pest mortality and extended residual control

DOSAGE INFORMATION

Chickpea-250gm/500L, Cucumber-200-250gm/500L, Rice-300gm/500L, Chilli-400gm/500L, Tomato-400gm/500L

APPLICATION BENEFITS

Powerful diamide and pyrethroid combination, enhanced pest control with synergistic action, immediate knockdown and long-lasting protection, calcium release disruption and sodium channel interference
