

# FOLPET 50% WP

## FUNGICIDE

**BROAD-SPECTRUM  
PROTECTIVE FUNGICIDE**

**MULTI-SITE CONTACT  
PROTECTANT**

**EXCELLENT PREVENTIVE  
CONTROL**

**RESISTANCE MANAGEMENT  
& CROP SAFETY**

### TARGET DISEASES

### CROPS

-  Grapes
-  Apple
-  Stone Fruits
-  Vegetables

### TARGET DISEASES

- Downy mildew (*Plasmopara viticola*)
- Powdery mildew (*Erysiphe necator*, *Podosphaera* spp.)
- Scab diseases (*Venturia* spp.)
- Botrytis cinerea (Gray mold)

### PRODUCT DESCRIPTION

Broad-spectrum protective fungicide in wettable powder formulation for versatile application providing excellent preventive control against a wide range of foliar and fruit diseases.

### MODE OF ACTION

Folpet functions as a multi-site contact protectant fungicide releasing active phthalimide compounds that disrupt thiol-containing enzymes and cellular processes, preventing fungal spore germination and early infection stages through non-specific multi-site activity, making resistance development extremely unlikely.

### APPLICATION BENEFITS

Excellent preventive control of foliar and fruit diseases with proven compatibility in integrated disease management programs. Ideal partner fungicide in resistance management.

### APPLICATION RECOMMENDATIONS

Protective spray application before disease onset with 7-14 day intervals during high disease pressure.
