

METAZOSULFURON 33% WG

POST-EMERGENCE HERBICIDE

PRE- & POST-EMERGENCE

DUAL ACTION
Contact & Systemic

BROAD SPECTRUM

EFFECTIVE CONTROL

TARGET WEEDS

Echinochloa spp.

Cyperus difformis

Fimbristylis spp.

CROPS

-  Rice (Transplanted)
-  Wheat
-  Barley
-  Oats
-  Sugarcane

PRODUCT DESCRIPTION

It provides post-emergence control of grasses, sedges, and broad-leaved weeds in transplanted and direct-seeded rice.

MODE OF ACTION

Metazosulfuron inhibits the ALS enzyme, disrupting amino acid synthesis and halting cell division in susceptible weeds. Absorbed by foliage and roots and translocated throughout the plant

DOSAGE

120-150 g/ha

TARGET WEEDS

Echinochloa spp.
Cyperus difformis
Fimbristylis spp.
Ammania spp.
Monochoria vaginalis
