

# METIRAM 55% + PYRACLOSTROBIN 5% WG

## FUNGICIDE

**PREMIUM FUNGICIDE  
COMBINATION**

**MULTI-SITE +  
STROBILURIN  
CHEMISTRY**

**ENHANCED DISEASE  
CONTROL + PLANT  
HEALTH BENEFITS**

**EXTENDED PROTECTION  
+ PHOTOSYNTHETIC  
EFFICIENCY**

**STRESS  
TOLERANCE**

### TARGET DISEASES

### CROPS

- Grapes
- Vegetables
- Tomato
- Potato
- Chilli
- Onion
- Cotton
- Apple
- Pomegranate
- Blackgram
- Greengram
- Groundnut
- Banana
- Cucumber
- Bitter gourd
- Cumin

### PRODUCT DESCRIPTION

Powerful premium combination fungicide with WG formulation offering excellent preventive control with multiple modes of action for comprehensive disease management and plant health benefits.

### MODE OF ACTION

Metiram acts as multi-site contact protectant disrupting thiol-dependent enzymes. Pyraclostrobin inhibits mitochondrial respiration at Qo site.

### TARGET DISEASES

Downy mildew, Powdery mildew, Anthracnose, Early/Late blight, Leaf spots, Purple blotch, Sigatoka, Tikka, Fruit spot, Premature leaf fall.

### DOSAGE

CROP	DOSAGE	PHI
Grapes- Powdery mildew, Anthracnose	1500-1750g/ha	15 days PHI
Tomato - Early/Late blight, Purple blotch	1500-1750g/ha	15 days PHI
Potato - Early, Apple, Tikka	1500-1750g/ha	23 days PHI
Chilli - Pomegranate, Blackgram + Premature leaf fall	1500-1750g/ha	23 days PHI
Onion - Greengram, Bitter gourd	1500-1750g/ha	23 days PHI
Premature leaf fall	1500-1750g/ha	23 days PHI

### APPLICATION BENEFITS

- Excellent preventive control, comprehensive disease management.
- Physiological benefits.
