

CYFLUFENAMID 5% EW

FUNGICIDE

**NOVEL SYSTEMIC
FUNGICIDE**

**POWDERY MILDEW
SPECIALIST**

**EXCELLENT VAPOR ACTIVITY &
TRANSLAMINAR MOVEMENT**

**UNIQUE MODE OF ACTION &
RESISTANCE MANAGEMENT IDEAL**

TARGET DISEASES

CROPS

Grapes

Cucurbits

Chilli

Vegetables

Tree fruits

Ornamentals

Blackgram

PRODUCT DESCRIPTION

Novel systemic EW formulation combining a control for powdery mildew, powdery mildew and groud with strong enputence control.

MODE OF ACTION

Cyflufenamid inhibits fungal signal transduction pathways with inton, both vapor-phase activity and strong translaminar movement, with superior translaminar movement.

DOSAGE

CROP	DISEASE	PHI
Chilli	Powdery mildew/Leaf spot/Anthracnose	300 in 500L water, 5 days
Grapes	Powdery mildew	500 in 500L water, 25 days
Blackgram	Powdery mildew	500 in 500L water, 25 days

APPLICATION BENEFITS

- Vapor activity redistribution with ør multiple modes of action.
- Excellent coverage for intervals high disease pressure.
- Resistance management programs.
