SELECTIVE SPECTRUM

EFFECTIVE CONTROL

TARGET WEEDS

CROPS

 Rice

PRODUCT DESCRIPTION

It provides post-emergence control of grasses, sedges, and broad-leaved weeds in transplanted and direct-seeded rice

TARGET WEEDS

- Grasses, Sedges, Broad-leaved weeds

MODE OF ACTION

Penoxsulam inhibits the ALS enzyme, disrupting amino acid synthesis, while Butachlor inhibits cell division in germinating weed shoots. The combination ensures effective and extended control of multiple weed species
