WATER-SOLUBLE COMPLEX FERTILIZER

BALANCED NUTRITION

DUAL ACTION
Contact & Systemic

IMPROVED CROP QUALITY

QUICK ABSORPTION

CROPS

CROPS

-  Vegetables
-  Fruits
-  Sugarcrops
-  Field crops
-  Greenhouse crops

PRODUCT DESCRIPTION

It provides water-soluble complex containing equal proportion of a broad spectrum of anionic phosphorus, and Potassium stages with uniform nutrient availability.

BENEFITS

- Balanced nutrition for all plant growth stages
- Improved crop yield
- Suitable absorption and foliar application

MODE OF ACTION

The basis is absorbed through the root system and directs equal control to the root system, while Nitrogen promotes vegetative growth, enhances photosynthesis, promotes translocation of nutrients to the fruit, and improves fruit quality and overall plant growth.
