# BIFENTHRIN 2.5% EC

INSECTICIDE

## PRODUCT DESCRIPTION

**Bifenthrin 2.5% EC** is a synthetic pyrethroid insecticide and acaricide with broad-spectrum contact and stomach action. Exhibits high potency at low dosages with excellent knockdown effect and extended residual control of various insect pests and mites.

## MODE OF ACTION

**Bifenthrin** acts on the nervous system of insects by disrupting sodium channel function, causing paralysis and death. It is highly effective for termite control and is suitable for use in both pre-construction and post-construction anti-termite treatments.

## DOSAGE & RECOMMENDATION

Use	Method of Application	Dosage (a.i.)	Dilution
Plywood	Glue Line Poisoning	10 g/m <sup>3</sup> of wood	400 ml formulation
Plywood	Dipping	0.025% Solution	Mix 1 litre of formulation in 99 litres of water to make 0.025% solution
Veneer	Dipping	0.025% Solution	0.025% solution
Wood	Dipping / Brushing	0.025% Solution	Mix 1 litre of formulation in 99 litres of water to make 0.025% solution

## KEY APPLICATION AREAS

- Plywood
- Veneer
- Wood • Anti-termite treatment (pre & post construction)

## FEATURE HIGHLIGHTS:

Broad-Spectrum Pyrethroid Insecticide

Long-Lasting Residual Control  
Effective Against Termites & Wood-Destroying Pests
