

FLONICAMID 10% SC

INSECTICIDE

**SELECTIVE FEEDING
BLOCKER**

**RAPID FEEDING
CESSATION**

**VIRUS TRANSMISSION
PREVENTION**

**INTEGRATED PEST
MANAGEMENT**

TARGET PESTS

Aphids

Whitefly

Brown Plant Hopper

CROPS

- Cotton,
- Vegetables,
- Rice,
- Fruits

PRODUCT DESCRIPTION

Novel insecticide with selective feeding blocker activity against sucking pests. Causes rapid cessation of feeding protecting crops from damage and virus transmission with minimal impact on beneficial insects.

MODE OF ACTION

Flonicamid acts as selective homopteran feeding blocker, disrupting stylet penetration and salivation. Causes immediate feeding cessation preventing damage and virus transmission, followed by death through starvation.

TARGET PESTS

- Aphids (*Aphis* spp.)
- Brown plant hopper (*Nilaparvata lugens*)
- Jassids (*Amrasca biguttula*)
- Whitefly (*Bemisia tabaci*)
- Brown plant hopper (*Nilaparvata lugens*)
- Jassids (*Amrasca biguttula*)
