

PRETILACHLOR 50% EC

SELECTIVE PRE-EMERGENCE HERBICIDE

Pre-Emergence

Mitosis Inhibitor

Protein Synthesis Inhibitor

TARGET WEEDS

GRASS WEEDS

Echinochloa crus-galli
(Barnyard grass)

GRASS WEEDS

Leptochloa chinensis
(Chinese sprangletop)

FORMULATION

Eriochloa villosa
(Goose grass)

DILUTION (mL/Day)

Cyperus difformis
(Umbrella sedge)

DOSAGE AND RECOMMENDATION

- Transplanted Rice
 - *Echinochloa crus-galli*
 - *Echinochloa colona*
 - *Cyperus difformis*
 - *Cyperus iria*
 - *Eriochloa villosa*
 - *Eclipta alba*
 - *Ludwigia parviflora*
 - *Monochoria vaginalis*
 - *Leptochloa chinensis*
 - *Panicum repens*

PRODUCT DESCRIPTION

Selective pre-emergence herbicide for control of grasses and certain broad-leaved weeds in **transplanted rice**. Provides excellent residual control with minimal **crop injury**.

MODE OF ACTION

Pretilachlor inhibits cell division and protein synthesis in germinating weed seedlings as well as shoots and roots of emerging weeds preventing establishment with activity period **of 30-40 days**.
