PYRAZOSULFURON ETHYL 10% WP

SELECTIVE SYSTEMIC HERBICIDE

Pre & Post Emergence

ALS Inhibitor

Extended Residual Control

TARGET WEEDS

SEDGES

Smallflower umbrella sedge
(*Cyperus difformis*)

GRASS

Echinochloa spp. (Barnyard grass)

GRASS

BROADLEAF WEEDS

Ludwigia spp.
(Water primrose)

DOSAGE AND RECOMMENDATION

- Transplanted Rice
 - *Cyperus iria*
 - *Cyperus difformis*
 - *Echinochloa* spp.
 - *Fimbristylis miliacea*
 - *Monochoria vaginalis*
 - *Ludwigia parviflora*
 - *Monochoria vaginalis*
 - *Leptochloa chinensis*
 - *Panicum repens*

PRODUCT DESCRIPTION

Selective systemic herbicide for control of sedges, grasses, and broad-leaved weeds in transplanted rice. Provides both pre and early post-emergence control with extended residual activity.

MODE OF ACTION

Pyrazosulfuron ethyl inhibits acetolactate synthase (ALS) enzyme blocking synthesis of branched-chain amino acids. Stops cell division in meristematic tissues causing growth cessation and death within **10-15 days**.
