

# NITENPYRAM 15% + PYMETROZINE 20% OD

ADVANCED OIL DISPERSION FORMULATION COMBINING  
NEONICOTINOID WITH SELECTIVE FEEDING BLOCKER

**RAPID  
KNOCKDOWN**

**SUSTAINED  
PROTECTION**

**SUPERIOR  
RAINFASTNESS**

## TARGET PESTS

Psyllids

Aphids

Jassids

## CROPS

- Cotton
- Rice
- Vegetables
- Fruits

## PRODUCT DESCRIPTION

Advanced oil dispersion formulation combining neonicotinoid with selective feeding blocker. Delivers rapid knockdown of sucking pests with sustained protection. Superior rainfastness and translaminar activity ensure thorough coverage.

## MODE OF ACTION

Nitenpyram acts as nicotinic acetylcholine receptor agonist causing rapid paralysis, while Pymetrozine blocks stylet penetration causing starvation. Combined action provides immediate knockdown plus long-term suppression of aphids, planthoppers, and whiteflies.

## DOSAGE

Crops	Target Pest	Dosage/ha	Formulation (ml)
Cotton	Aphids, Whiteflies, Jassids	400-500	400-500
Rice	Brown planthopper, Aphids	350-450	350-450
Vegetables	Aphids, Whiteflies	350-450	350-450
Fruits	Aphids, Psyllids	400-500	400-500
